

PHP Developer Role

We're on the lookout for an **enthusiastic** and **talented PHP Developer** to help us further develop our industry-changing product, Phase4.

Ideally you love the thought of working in a **small team** of **friendly** and **crazily skilled people** (like yourself). You should also get excited by the thought of working in an **agile, developer-friendly** and **fun environment**.

Stuff we'd like you to have experience with:

- ★ Object Orientated PHP5
- ★ MySQL or similar
- ★ Standards compliant HTML & CSS
- ★ JavaScript

It would also be great if you had:

- ★ Experience with PHP frameworks (we use ZF2)
- ★ Experience with Linux (we use Ubuntu)
- ★ Knowledge of Doctrine2
- ★ A viable strategy for a zombie apocalypse

Here at Protec Innovations we live and breathe software development.

We love it!

So we've made sure that every aspect of our company is **coder friendly**.

From our **cutting edge** development practices, to **top-spec** development machines, our **spacious, peaceful** working environment and **really comfy chairs**, we've made sure that Protec's is a great place to come and code.

Interested?

If all of this sounds like your cup of tea then please get in touch, we've been looking for someone just like you.
